# DESIGN AND THERMAL VALUES.

**GAULHOFER** offers windows for prominent architectural solutions and displays that progressive aesthetics can also be combined with superior insulation values.

All-Glass Solution VISIONLINE

# SUSTAINABILITY.

As an industrial producer, GAULHOFER assumes responsibility for energy efficiency and resource conservation through:

- Closed recycling circuits
- Use of wood only from sustainable forests
- Custom cane production
- A separate heating facility in Übelbach

Heating plant - Übelbach

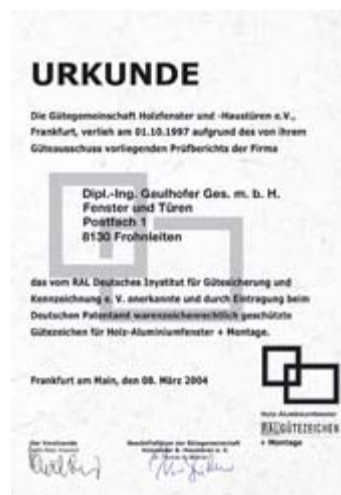

# QUALITY.

## WE ARE OUTSTANDING!

Windows should be enjoyed for a lifetime. For this reason, GAULHOFER windows are regularly inspected by internationally recognized, third-party institutions and are subject to continuous operational quality control.

Production sites in Übelbach and Mäder are certified according to ISO 14001 (environmental standards). This ensures consistent quality and compliance with the intended performance values for each delivered product.

# COMPANY HISTORY.

## 1919.

**Karl Gaulhofer** founds a construction and furniture workshop in Styrian Frohnleiten.

## 1929.

The success of the company leads to the continuous expansion of the production capacities. Karl Gaulhofer acquires a larger business area and erects a new workshop and administrative building.

The first employees (1925)

## 1954.

**Karl Gaulhofer** takes over his father's business after his architecture studies. In the following years, the company will carry out prestigious large-scale projects nationwide in all areas (furniture, interior finish, windows, doors).

Expansion continues with the construction of the main hall.

## 1954.

**GAULHOFER** recognizes the signs of the times and begins operations as one of the pioneers in Austria to mass produce standard sizes of windows and doors. The following year, an Austrian dealer distribution network was established.

# 1977.

Export to other markets begins.

The cooperation with S+S Qualitätsfenster GmbH is the first step beyond Austria's borders and the establishment of an additional sales organization for export.

# WORLDWIDE DISTRIBUTION NETWORK.

# WOOD NATURELINE.

## WOOD NATURELINE 78

NATURELINE 78 is the most popular wooden window in Austria and is one of the best-sellers throughout Europe. The construction depth of 78mm combined with with the standard features including GAULHOFER Thermostop®, GAULHOFER Audiostop® and GAULHOFER Dampfstop® ensure a best-in-class U-value of 0.70 W/m<sup>2</sup>K.

## WOOD NATURELINE 92

The GAULHOFER NATURELINE 92 with a wide 92 mm depth is the premium window solution in the wood segment.

# WOOD/ALUMINUM

## **WOOD/ALU FUSIONLINE 94 PURE**

FUSIONLINE 94 is the top seller from the group of wood and wood/aluminum. With the standard features including GAULHOFER Thermostop®, GAULHOFER Audiostop® and GAULHOFER Dampfstop® as well as three different aluminum shell designs, FUSIONLINE is a window without compromise.

## **WOOD/ALU FUSIONLINE 108 PURE**

The noble FUSIONLINE 108 exceeds standards. The strong 108 mm depth of wood and aluminum make this window the "S-Class" of the GAULHOFER range.

# uPVC AND uPVC/ALUMINUM.

Our uPVC and uPVC/aluminum windows are high quality energy savers. **GAULHOFER ENERGYLINE** comes without steel reinforcement and can achieve an unmatched  $U_w$ -value of 0.59 W/m<sup>2</sup>K.

**GAULHOFER** has been a pioneer for the energy rehabilitation and passive house market throughout Europe.

**ERGOLINE** is a traditional uPVC window, however it is still equipped with a triple gasket sealing system to ensure the highest performance at a budget price.

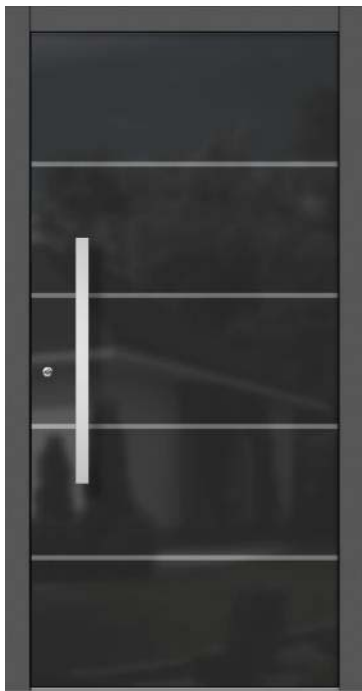

EIN FENSTER LANG,  
EIN LEBEN LANG.
