GREEN BUILDING FESTIVAL SPONSORSHIP PROSPECTUS

Dear Sustainable Building colleague:

On October 8th, the 2019 Green Building Festival will take place at the Toronto Eaton Centre Downtown Marriott, Toronto.

As in previous years, the Green Building Festival will draw an anticipated 400 sustainable building professionals to enjoy a full day of presentations by international experts on cutting-edge projects and inspiring case studies.

This year, programming addresses the theme “Simple versus Complex: Building in a Changed Climate”. With more challenges to meet than ever before, the 2019 Green Building Festival will examine both simple and complex strategies, techniques and technologies to inspire the building community in reaching the goal of zero carbon.

The following Festival sponsorship prospectus features a range of marketing and sales opportunities for your company to reach and engage hundreds of quality leads: sustainable building experts, leading-edge opinion leaders and decision-makers from across the country.

Several sponsorships for 2019 have already been snapped up by incumbent sponsors who have been pleased with the Festival's ROI, so let's talk about opportunities while they last!

Thank you for your anticipated interest and support.
