Across Canada, builders look to ENERGY STAR to improve the quality of their buildings while lowering their occupants’ energy bills and carbon footprint. With a name that 90% of consumers recognize, ENERGY STAR has become the trusted symbol for builders who value sustainability and quality. Now the same simple and affordable program is available for builders to certify their mid/high-rise multifamily buildings.

**PROGRAM REQUIREMENTS**

- Exceed the energy target (15% better than code)
- Conduct air tightness testing & mechanical commissioning
- Install ENERGY STAR appliances
- Register in ENERGY STAR Portfolio Manager
For more information or to get started today, contact Kain Allicock, Program Manager, at 416-447-0077 or email kain@enerquality.ca

This project was made possible through the financial support of the Independent Electricity System Operator

---

**CERTIFICATION STEPS**

1. **ENROL your building(s)**

2. Provide your **DESIGN SUBMISSION**
