

CODE ACCELERATION FORUM WORKSHOP MARCH 10, 2026 KINGSTON 8:30AM – 2:00 PM EST

IN-PERSON LEARNING & NETWORKING OPPORTUNITY

How do you know when a Performance Model meets Code? What technologies and practices are required to achieve the highest tiers, and how can you inspect, evaluate, and verify them?

Come join Sustainable Buildings Canada (SBC), in collaboration with local Subject Matter Experts as we explore the new Tiered Energy Performance Path using a Part 9 local example.

Come learn in-depth about and undertake workshop exercises on:

- The National Building Code (NBC) 2020 Part 9.36 tiered performance path
- Energy modelling inputs and assumptions
- How to read an energy modelling report
- Verifying energy conservation measures
- Technologies and practices to achieve higher tiers
- How Integrated Design Practices achieve optimal designs
- Highlights of 2025 Code cycle changes
- Direct access to speakers/SMEs, peer exchange and interactive discussions
- In-person up-skilling experience

Please register to reserve your spot below. In-person* (with breakfast & lunch) or online options are available. As in-person options are limited, register early to avoid disappointment!
